

## **Popular Lectures 2022-3 and 2023-4**

### **For 2022-3 the story so far is**

13 October 2022: Zoe Griffiths, “Adventures in the fourth dimension”, online.

24 November 2022: Ed Hardy, “Dark matter and dark energy: mysteries of the universe”, in person.

13 December 2022: Andrew Jeffrey (Christmas Lecture), “Mathematics: the joy and the magic”, in person.

2 February 2023: Ivona Grzegorzcyk, “Fine arts and mathematics”, online.

### **To come:**

17 May 2023: Damian Haigh, “Phi, phyllotaxis and Fibonacci” (Presidential Lecture), venue and details to be announced.

### **For 2023-4 the lectures arranged so far:**

18 October 2023: Tony Padilla, details to be fixed, including title and venue. In person.

13 December 2023: Alison Kiddle, Christmas Lecture. Details to be fixed. In person.

### **We could do with another maybe online lecture in November, possibly an internal speaker.**

Lisa Baggaley is negotiating with Ems Lord (Enrich) about an online Primary based lecture. That could equally well be the November lecture, and an internal speaker found for the winter/spring.

There will be a Presidential Lecture in 2024 (Rachel Bearon) and we need another winter/spring lecture, maybe the internal one. I have not as yet made progress with that.
